Avery Chen

Junior Software Developer

avery.chen@example.test | Halifax, Canada

Junior software developer with project work across Python API integration, automated testing, CI, and setup documentation. Brings peer collaboration and a careful approach to missing optional fields, and is ready to contribute through code review while learning Docker and production deployment.

Projects

Community Data Export

2024

Built a Python script that fetches data from a public API and writes CSV files. Added pytest tests exercising the missing optional field edge case, configured GitHub Actions to run tests on pushes, and documented setup and input assumptions in a README.

Python | Public APIs | CSV | pytest | GitHub Actions

Course Application

2023

Collaborated with three peers on a small course application.

Education

Bachelor of Computing

North Coast University

Skills

Programming and data: Python, CSV

APIs: Public API integration

Testing and CI: pytest, GitHub Actions, Automated testing, Edge-case testing

Documentation and collaboration: README documentation, Peer collaboration
